Subject

Water Supply to the town
of Chelamangala

Petition dt 28.6.07 27-8-03
from Sankara Sastry and other
inhabitants of Chelamangala

(1) The Petitioners complain
that the town of Chelamangala,
which contains 4000 inhabitants
and 1000 cattle has no water
convenience in the hot season and
that they represented their grievances
to Govt in years several times. They
pray that the town may be supplied
with water from the Hossangatta
Tank or that the water of
from the tank of Chelamangala
may be reserved for drinking water
supply to the town, the wet cultivation
of the lands thereunder being stopped
altogether

2. It is submitted that the question of preserving the water of the Velamangala Tank was discussed as subject etc 382 at the Dasara Assembly held on October 1892 and that in the Dewan's reply thereto, the D) (Com was directed to enquire into the matter and arrange to prevent waste of water for irrigation purposes. Draft submitted forwarding the Petition to the Presd D) (Com for report with special reference to the action taken on the Dewan's direction

3 The question of water supply to the town by laying out branch pipes from the Hesaraghatta Pumping Station or by the tank having reserved for drinking purposes was also discussed as subject etc to 336 of the Dasara Representation recently for the year 1901 and in reply of (Govt thereto the matter was referred to the Chief Engineer for investigation

4, May the Chief Engineer be requested to report the result of his investigation in the matter submitted with another draft for all our (

5. As ordered, the 3 petition was forwarded ⊗ to the Dy Comr for report with special reference to the action taken by him as regards prevention the wastage of water off the Nelamangala Tank, for irrigation purposes.

20 1417 & 10-8-03
2 303

6. The Dy Comr now reports ⊗, that the water inconvenience experienced by the Aowasmen could be obviated only by reserving the tank water solely for drinking purposes; that the advisability of reducing the Kandayam of the wet lands under the tank by ½ the "Hare" rate, in order to effect the reservation contemplated, is under correspondence with the Dev Comr; and that the final disposal of the matter by the latter will be intimated to this Govt office, in due ~~course~~ course

V

7. The information called for from the Chief Engineer in ellemo ⊗ 220 d 2·760 02 15/7/03 on the same subject has not yet been received.

Submitted for orders as to whether the Precedent may be acted Why? / expedite the early receipt of the report & a reminder sent to the Chief Secd recommended to the Engr 18/8/03

18/8/ Sr Asstt, D.F. 13/8/03

8. In reply to this office memo dated 15th. July 1903 No $\frac{226 \text{ D}}{2760-02}$, the Chief Engineer reports, that the Nelamangala Tank with its small catchment, yielding some 70 units in an average year, and getting dry in bad seasons, is quite useless as a source of water supply to the town; that, the town of Nelamangala being situated on a watershed, a gravitation supply from the Hesaraghatta Reservoir, is not possible without pumping, the cost thereof being prohibitive to the municipality; that the only alternative is either to deepen the existing wells or construct new ones as funds permit; and opines, that if water pumps be used for wells, they can be worked by an aermotor or windmill for some 9 months in the year, and by hand or steam power during the remaining three months, when there will be no sufficient wind.

9. The Executive Engineer Hesaraghatta Water Supply Division whose investigation report is submitted by the Chief Engineer, states that the question of a suitable water supply to the town can be

most easily solved if good springs could be tapped by ~~an~~ sinking Artesian wells, and proposes that a grant of Rs 100 may be made for making a trial.

Submitted for orders as to whether the President may be asked pending the investigation referred to in para 6 supra, to report if the Municipality is prepared to allot 100 Rs for the trial well referred to by the Ex Engineer Water Supply Division, a copy of whose report may also be forwarded to the President

JHB
16/9/03

On 24/9/03

10 The above information was called for in this office docket no 1430 & 760 02 dy 11-10-03 the Municipal Board of Velamangala plead want of funds to pay Rs 100 for ½ the cost of sinking a trial well (Artesian well) in the bed of the tank

11 The financial condition of the Municipality as per sanctioned budget for 1903 1904, and the actu opening balance on 1st July 1903, as per Comptrollers finial accounts for 1902-1903, is given below:—

Opening balance	661
Receipts for 1903-04	2,590
Total Receipts	3,251
Expenditure	2,316
Closing balance for 1903-04	935

which no more than the prescribed minimum by Rs 287. The sum of Rs 100 required for sinking the trial well may be met from this ~~large~~ balance.

12 But the President, however, thinking that the Municipality is too poor to pay,

his former proposal (See para 6) of reserving the Nelumangala tank solely for drinking purposes, for one year, as an experiment to ascertain whether the water in it can last all the year round. The President has not stated whether the question of reducing by half, the Kandiyan of the wet lands under the tank, said to be pending in the Revenue Commissioner's office has been since disposed of and if so how. The President may be asked to furnish this information

Submitted for order. (Issue draft)

MJ 16/1/04. JB

18/1/04

13 The above information is for in this office docket no 2662 / 1760-62 of 20th January 1904.

14 The President states,

question of reducing the Kanda jama of the wet lands under the Nelamangala tank is still pending in the Revenue Commissioner's office.

May this be called for by reminder being received.

L. File No. 60 of 1902

Serial No.

60. Letter no 7867 dated the 15th April 1903 from the Revenue Commissioner.

Forwards for such orders as the Govt may be pleased to pass correspondence ending with letter no 103 dated the 28th September 1902 from the Dy: Commissioner stating as his opinion that the whole quantity of water in the tank may be reserved for the purpose of supplying the wells in the town remitting half the kandayam to compensate the holders of lands under it, and state that ordinarily the Municipality would be liable to pay the loss of revenue to Government by the diversion of the water supply in addition to compensating the owners of lands which have to be converted from wet into dry.

From the Dy: Commissioner's letter and statements Q & R, it will be seen that the amount of kandayam which has to be remitted in case the water should be reserved comes to Rs 175-9-4 It will further be seen that

NOTE.—Contd. sheet

Serial No.

to the tank being very near the town it is difficult to preserve its water from contamination and that the main object of reserving its water is to supply the wells in the town

Submitted for orders.

Adding 20 as proposed by the Dy Comm 29/4 and the Executive Engineer Water Supply Division, the water in the tank may be reserved either for use solely for domestic purposes or for the purpose of supplying the wells in the Town as an experimental measure for 2 years, the Municipality paying half the Kandayan on the lands amounting to Rs 175-9-4 per annum. The income & Expenditure of this Municipality for the Current Year being as shewn below, and the closing balance at the End of the same period being more than the prescribed minimum by Rs 220 of. there can be no difficulty in debiting the cash to the Municipality.

22 I would visit this question when I was at Belavangla last year In the hot-weather the tank dries up as well as the wells in the town. The reservation of this tank for water-supply purposes seems therefore next to useless. There would be a loss of revenue & also perhaps a liability to pay compensation, without any corresponding advantage. On this point I quite agree with the Chief Engineer.

23. The supply asked for from the Hesaraghatta Reservoir is quite out of the question.

24 The sinking of tube wells as a trial at a small cost of Rs 100 may be sanctioned the cost being debited to the usual Famine heads are quite in a position to bear it.

as suggested by the Chief Engr W. I. Dn

Water supply to municipal town

ABSTRACT

Complain that people Nelamangala which contains 4000 population and 1000 cattle, have no water convenience in the hot season, that they represented their grievances before the Govt. in various several times.

Pray that the place may be supplied with

from the
ghatta village.
which supplies water
Bangalore city
and Cantonment, or
if this is not possible,
that the water of the
tank of Nelamangala
which supplies water
to a small area of
wet lands of about 40
acres, may be stopped
from being supplied
to these wet lands, and
it may be reserved
for the purpose of
drinking.

Yours
truly.
